

ControlUp Accelerated Onboarding Package

On-site & remote services for Hybrid Cloud & On-prem customers

Combines remote and on-site services with a ControlUp Software Architect to accelerate the deployment and usage of ControlUp.

Approach

Our team will:

- Perform architecture review and installations remotely.
- Work with your core team on-site to fully configure and optimize ControlUp.
- Provide future fine tuning and best practices training through a series of weekly calls.

Benefits & Outcomes

- You gain quick time-to-value with a configured environment ready to monitor & remediate production issues.
- Console and alerts tuned to ensure meaningful stress reported.
- Your core team receives formal basic administrative training & certification.
- In-depth knowledge transfer of the configuration to your core team.

Implementation Stages & Activities

Remote Architecture and Installation

- Size your environment.
- Provide architecture diagram.
- Perform installation once servers and services accounts are ready.

On-Site Configuration

Configure ControlUp Core Components:

- Folder Structure – to set up your ControlUp monitored environment
- Security Policy – to determine users and their permissions
- Trigger alerts & automated actions from the ControlUp community
- Insights – for powerful analytics and detailed reports

On-Site Optimization and Knowledge Transfer

Advanced configuration plus knowledge transfer in your environment to:

- Provide advanced optimization and stress tuning.
- Assist each of your users to configure their views.
- Give full formal classroom style training on all Console and Insights features.

Remote Best Practice Sessions

Weekly one-hour remote sessions for best practices and advanced configuration for up to two months.

- Review your priority one issues and use cases within the context of ControlUp.
- Provide recommendations for workflow and industry best practices.
- Develop strategies and assist with configurations for auto-remediation.

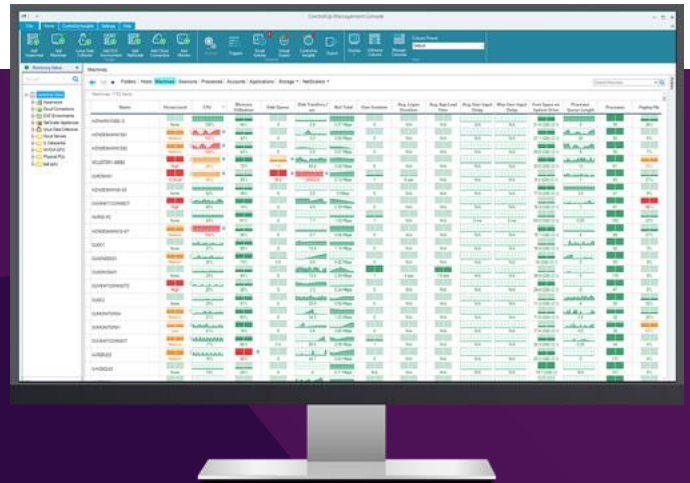

Individualized Knowledge Transfer & ControlUp Academy

Along with your free membership to the [ControlUpAcademy](#), your ControlUp team provides knowledge transfer tailored to your environment's needs. The specific areas can include these topics.

Console Overview

Understanding Console Panels and Features

- Agentless vs Agent Data Collection
- Organizational Structure / View
- Grid View, Aggregation, Drilldown / Focus
- Grid Workflow (i.e., Hosts | Computers | Sessions | Processes ...)

Use Cases Deep Dive

Use Cases / Troubleshooting Workflow

- Performance (Hosts, Desktops, Servers, Apps)
- Hosts and Data Stores
- Contextual Actions
- Script Based Actions (SBAs)
- Incident Triggers
- Events
- Preset Views / Custom Views
- Fast Troubleshooting with Groupings

- End User Experience & Performance
 - Searching & Sorting
 - Logon Duration
 - Support
- Management Tasks (Controllers)
 - Services
 - Registry
 - File Systems
 - Programs & Updates

Insights

Utilizing Historical and Trending Reporting via Insights

- Overview of Historical and Trending Reports
- Drilling down in History / Trending Reports
- Top Contributors to an Issue
- Recommendation / Prescriptive Logic

Security

Understanding the ControlUp Security Policy

- Security Policies
- Configuring and Managing Roles
- Managing Permissions

Cost: \$5,000

* Due to current Covid travel restrictions, all on-site sessions can be done remotely with travel expenses deducted from the fee.
